EDUCATION

2023 - Present

UNIVERSITÉ DES SCIENCES ET DE LA TECHNOLOGIE HOUARI BOUMEDIENE - USTHB

- Engineering Degree in Computer Science (Ingénieur d'État) – 3rd Year

SKILLS

- Programming: Java, Python, C++, SQL
- Web Development: HTML, CSS, JavaScript (basics), PHP
- Databases: MySQL, SQLite
- Tools: Git/GitHub, Linux
- Methodologies: Object-Oriented Programming, UML, Team Collaboration

LANGUAGES

- English (Operational)
- French (Fluent)
- Spanish (Basics)
- Arabic (Mother-language)

PROFILE

Computer Engineering student in the 3rd year of an Engineering degree (USTHB) with a strong foundation in software development, databases, networks, and information systems. Experienced in academic and team projects, applying object-oriented programming, database design, and version control (Git).

Motivated, detail-oriented, and eager to learn, I am seeking a remote opportunity (part-time or full-time) as a Junior Software Engineer to apply my skills, contribute to impactful projects, and grow within a professional environment.

PROJECTS & EXPERIENCE

Software Developer – Academic Project (USTHB, 2025)

- Developed a desktop application in Java (Swing) as part of a coursework project.
- Implemented core functionalities (UI, CRUD operations, file handling).
- Applied object-oriented programming principles and version control with Git.

Full-Stack Developer – Multidisciplinary Project (USTHB, 2025)

- Designed and implemented a web application applying principles of modal logic.
- Technologies: PHP, MySQL, JavaScript.
- Collaborated with a team of students to integrate logical models into a functional prototype.
- Produced technical documentation and presented results to faculty.
